MINI-PROJECT 3 · POWER BI

COUNTRY DEVELOPMENT & ECONOMIC PERFORMANCE

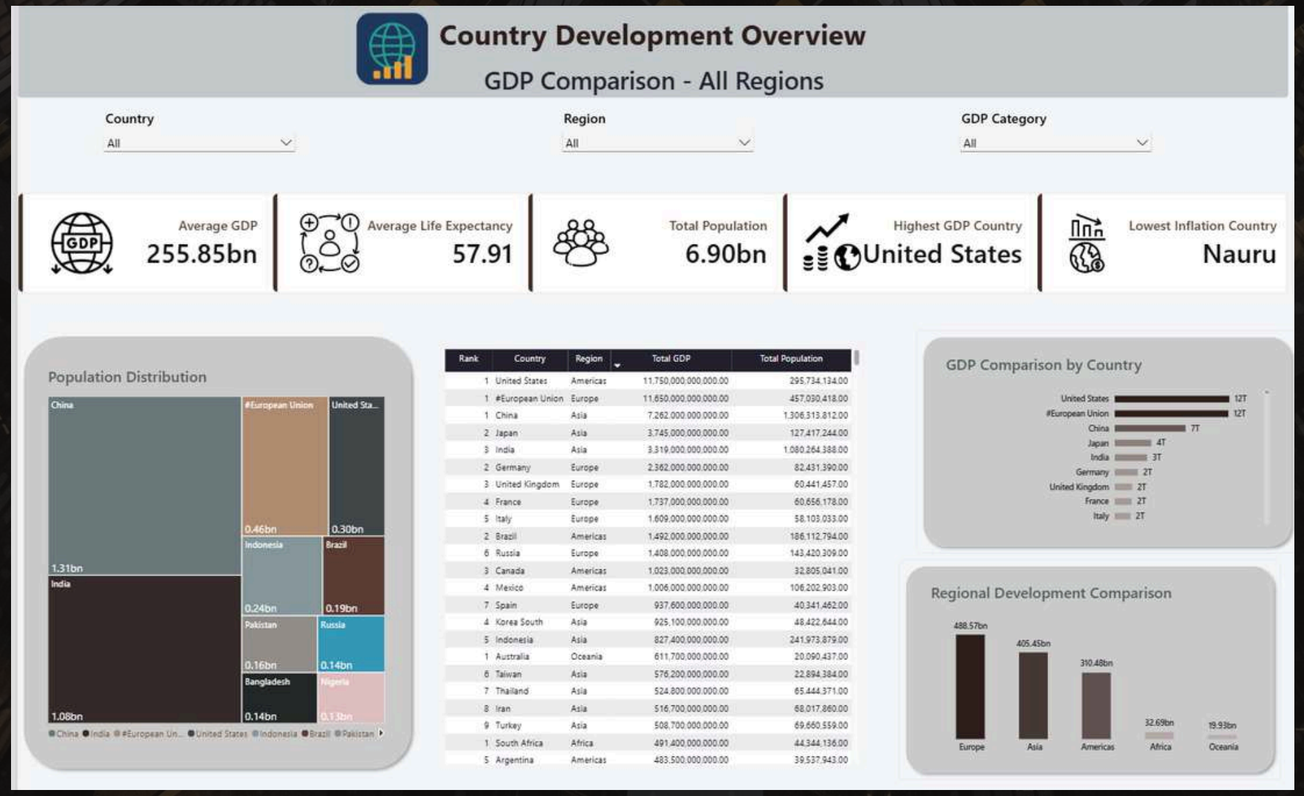

SARA RAAFAT MOHAMED

WHAT I LOOKED AT

- GOAL: COMPARE COUNTRIES ON ECONOMY, HEALTH, POPULATION AND TRADE
- DATA: 263 COUNTRIES, 45 INDICATORS
- BUILT WITH POWER QUERY, DAX AND POWER BI (3 PAGES + A DRILL-THROUGH PAGE)

DASHBOARD AT A GLANCE

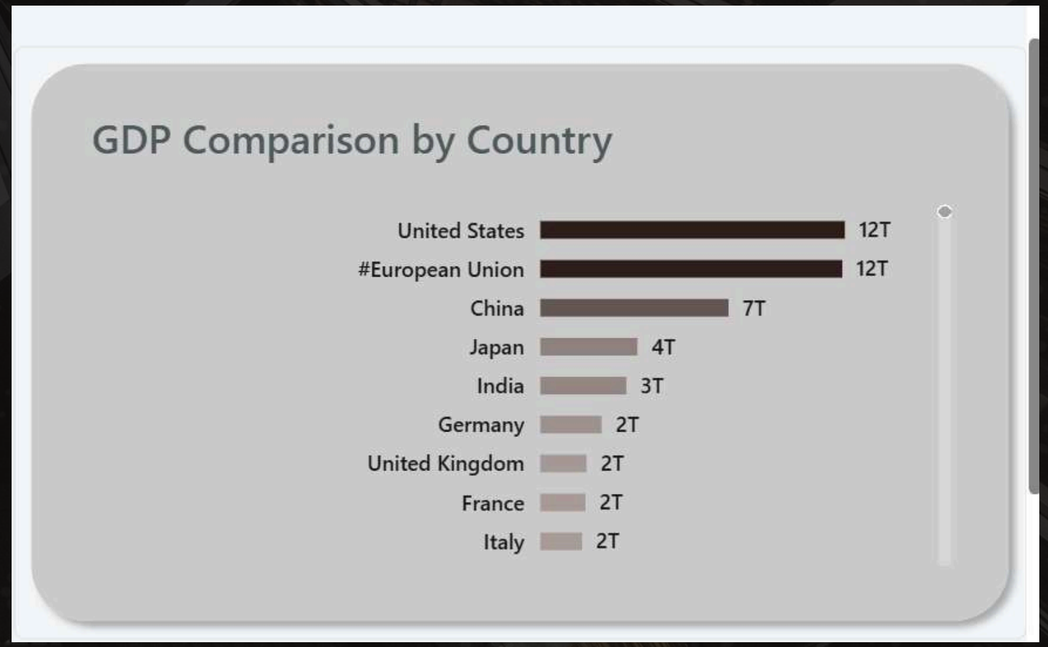

“One dashboard to compare countries and regions.”

A FEW COUNTRIES HOLD MOST OF THE WEALTH

56%

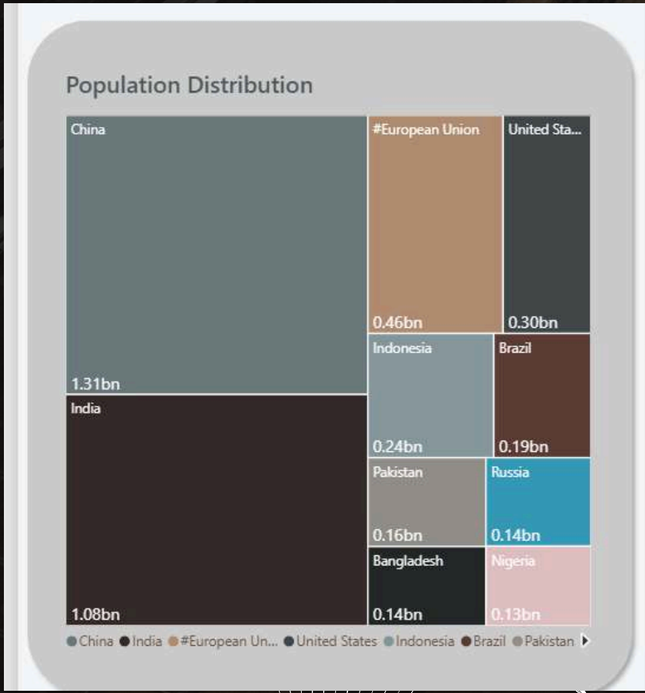

- The top 5 economies produce more than half of world GDP

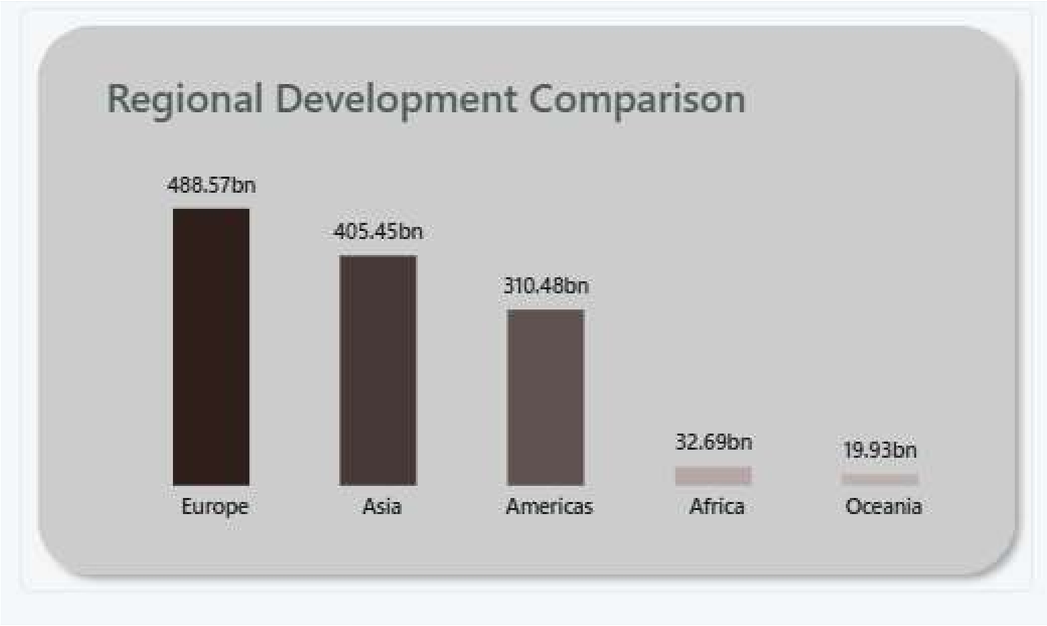

POPULATION AND WEALTH ARE NOT BALANCED

57% vs 32%

- Asia has 57% of the people but only 32% of GDP

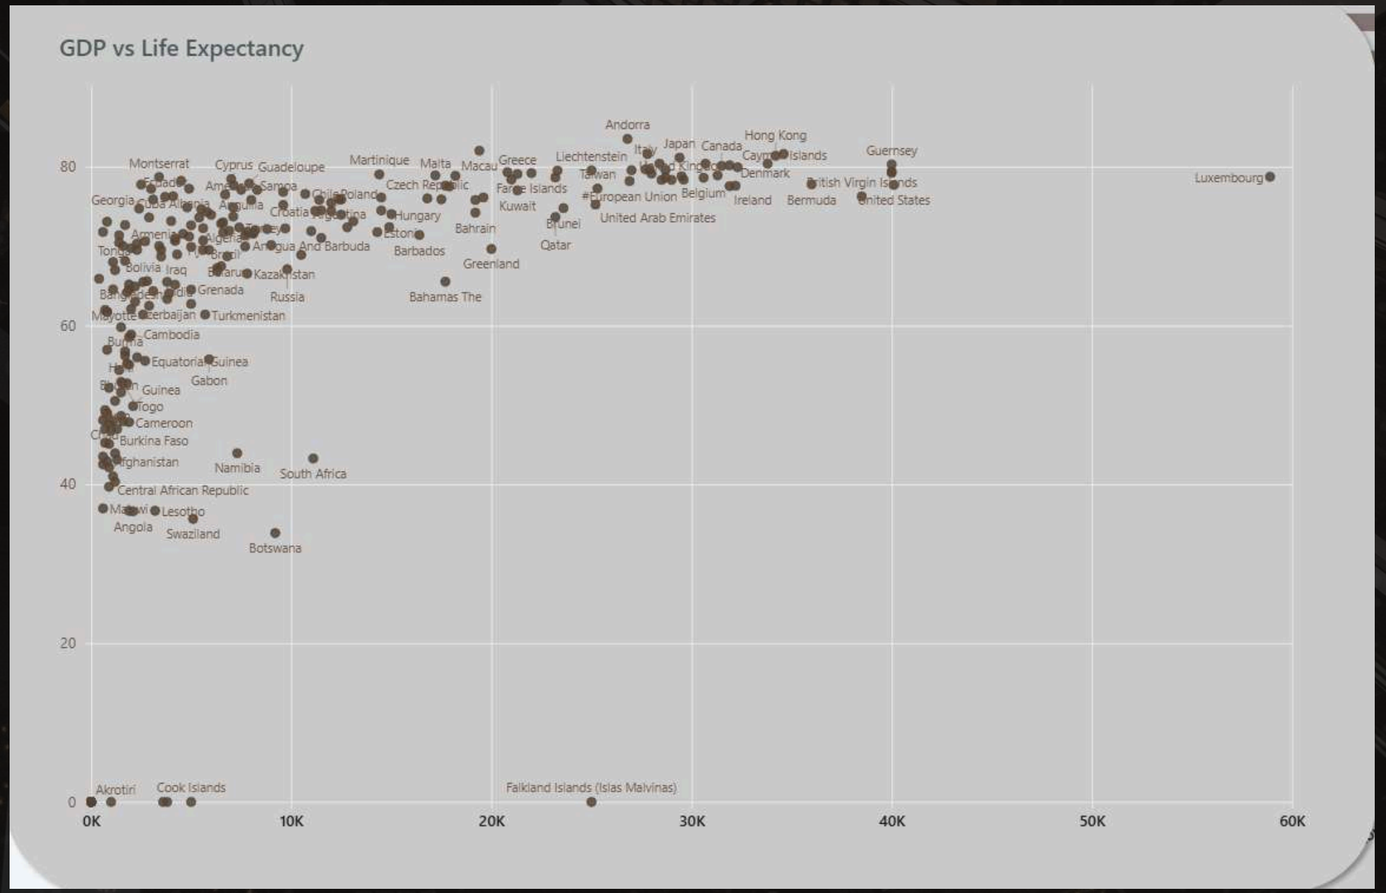

RICHER COUNTRIES LIVE LONGER

0.85

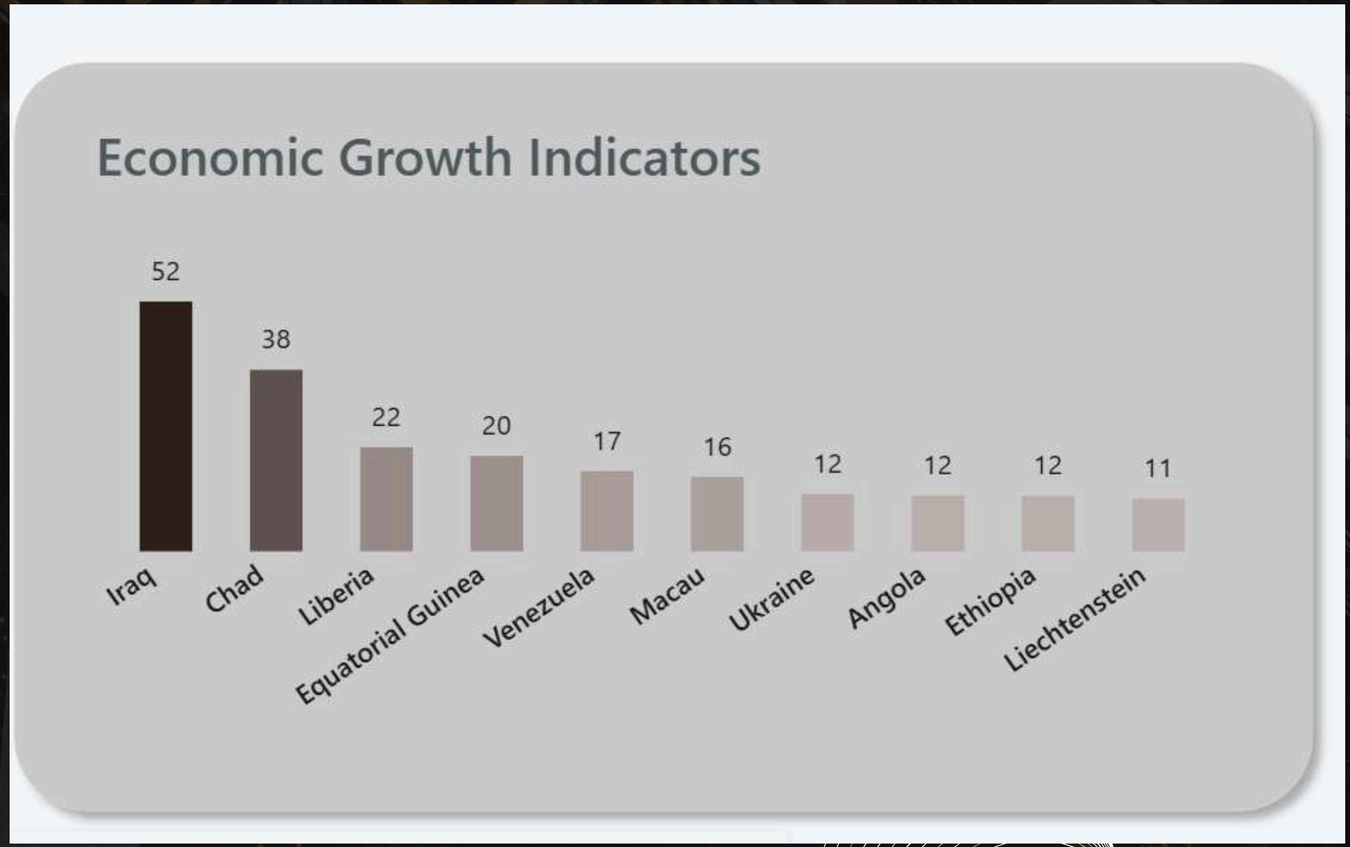

- Higher GDP per capita goes with higher life expectancy

POORER REGIONS GROW FASTER

6.57%

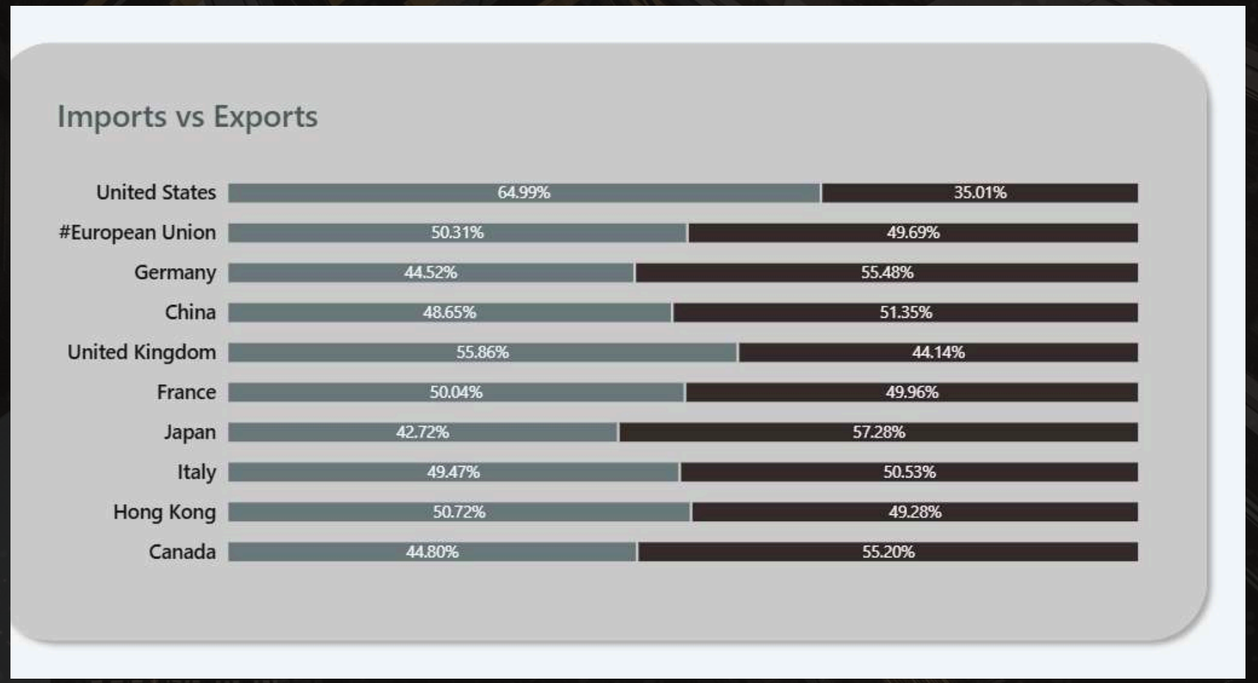

Asia has the highest growth, then Africa at 4.45%

MOST COUNTRIES IMPORT MORE THAN THEY EXPORT

155 vs 69

- 155 countries have a trade deficit, only 69 have a surplus

RECOMMENDATIONS & CONCLUSION

- Improve healthcare in Africa, where life expectancy is lowest
- Support the 29 countries with inflation above 10%
- Invest in fast-growing regions, not only the biggest economies

CONCLUSION

- Wealth is concentrated, health follows income, and growth is strongest in lower-income regions.

THANK YOU
